

Five checks before a bigger budget

Mark each supported, unclear or not yet, and note the evidence. Increase when all five are supported.

CHECK	QUESTION	STATUS	EVIDENCE
1. Delivery	Is the current scope delivered, by the contract's definition?		
2. Buyer relevance	Do the queries and pages behind the growth match your buyers? Any named deals?		
3. Quality at volume	Would three recent pages pass a helpful-content self-check at twice the output?		
4. Validated backlog	Can the provider name the next ten pieces of work and the evidence for each?		
5. Your capacity	Can your reviewers and approvers handle twice the requests?
